The following is an examiner's statement of reasons for allowance: The references of record, either singularly or in combination, do not teach or suggest at least a semiconductor device comprising: a first conductive layer formed over the interlayer insulating film and electrically connected to one of the source and drain regions of the first thin film transistor through a first opening; a color filter formed over the interlayer insulating film and the first conductive layer, wherein a second opening is formed in the color filter; and a pixel electrode formed over the color filter and electrically connected to the first conductive layer through the second opening, wherein the color filter covers the entire first thin film transistor and the entire semiconductor film except an area where the second opening is formed, and wherein the second opening does not overlap the first opening, wherein the pixel electrode is in contact with a portion of the color filter in the second opening.

Regarding claims 52, 58, 61, and all depending claims, the references of record, either singularly or in combination, do not teach or suggest at least a semiconductor device comprising: a first conductive layer formed over the first interlayer insulating film and electrically connected to one of the source and drain regions of the first thin film transistor through a first opening; a color filter formed over the passivation film, wherein a second opening is formed in the color filter; and a pixel electrode formed over the color filter and electrically connected to the first

conductive layer through the second opening, wherein the color filter covers the entire first thin film transistor and the entire semiconductor film except an area where the second opening is formed, and wherein the second opening does not overlap the first opening, wherein the pixel electrode is in contact with a portion of the color filter in the second opening.

Regarding claims 56, 59, and all depending claims, the references of record, either singularly or in combination, do not teach or suggest at least a semiconductor device comprising: a first conductive layer formed over the interlayer insulating film and electrically connected to one of the source and drain regions of the first thin film transistor through a first opening; a color filter formed over the interlayer insulating film, the first conductive layer and the first thin film transistor, wherein a second opening is formed in the color filter; and a pixel electrode formed over the color filter and electrically connected to the first conductive layer through the second opening, wherein the color filter covers the entire first thin film transistor and the entire semiconductor film except an area where the second opening is formed, and wherein the second opening does not overlap the first opening, wherein the pixel electrode is in contact with a portion of the color filter in the second opening.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
